Retrospective: MW Sprint 2

| Date	29th of April 2024
Team	Team ME-Wombat
Participants	@Andre Soetrisno @Jonathan Latti @Shaolong Xu @Sophie von Doussa @Aadesh Samdaria @Yuan

💬 Retrospective

Start doing	Stop doing	Keep doing
Make user stories/tickets more fine-grained, like one specific feature in the app	Adding too many tickets to the board as we go	Good team communication
More feature-focussed discussions	Not assigning points to tickets when they enter the backlog	Good vibe 🙂
Focus on getting apps/backends properly hosted faster, rather than self-hosting/local hosting		Good number of meetings
		Agile ceremonies
		Clean repository

✅Action items

- ☑ Plan Sprint 3 backlog
- ☑ Host apps early in sprint 3

🔥 Burndown Chart & Unfinished Tasks

We had a few tasks in sprint 2 that were not completed, and similarly a few tasks that were brought forward from sprint 3. This tied in to the issues with the burndown chart, since we were adding a number of tickets throughout the sprint. In sprint 3, we have set one of our primary goals to improving how we plan tickets, so that we have a more consistent burndown chart and don't leave any unfinished tasks.
