Sprint 4 Plan

Sprint Goal

In Sprint 4, our goal is to refine and enhance existing features. We'll implement minor improvements and fixes to ensure better functionality. Additionally, we will focus on resolving deployment issues for app store releases. This will help us deliver a more polished and reliable product to our client.

Update

- MS-1: Unfortunately, due to multiple challenge and requirement that is faced to publish the apps, (such as requiring 20 tester) this user story is beyond the scope of this project.
- MS-10: Due to limited time, Automated Appointment Notification in-build feature has to be deprecated because it causes crashing the entire AWS server. Unfortunately, with limited time, the cause and fix for the feature is unknown and thus has to be deprecated.

Sprint 4 Backlog (3 June - 7 June)

User Story ID	Tasks	Acceptance Criteria	Priority	Estimate Sizes	Dependencies
MS-1	📗 MW-203: Publish to Android App Store `DONE` 📗 MW-204: Publish to Apple App Store `DONE`	1. Patients should be able to download the app from the app store or google play store	Must Have	Medium	
MS-10	📗 MW-198: Testing auto appointment reminder on prod `DONE`	1. Mobile app should automatically receive notification about existing appointment 1 day before it is due.	Must Have	Small	

User Story ID	Priority	Estimate Story Points	Dependencies
📗 MW-198: Testing auto appointment reminder on prod `DONE`	Must Have	1	
📗 MW-199: Remove test endpoints `DONE`	Could Have	0.5	
📗 MW-200: Remove test patients `DONE`	Should Have	0.5	
📗 MW-201: Hide HTTP direct access inside AWS `DONE`	Must Have	2	
📗 MW-202: Write detailed user instruction for web app `DONE`	Should Have	0.5	
📗 MW-203: Publish to Android App Store `DONE`	Must Have	3	
📗 MW-204: Publish to Apple App Store `DONE`	Must Have	3
